

Karan Longani

Python Developer

I am a Python developer with 2 years of experience and a passion for problem-solving, building automation, RPA, and agentic AI systems. My strongest skills are web scraping, automation, and AI-driven solutions, and I am excited to keep putting these abilities to work in real-world settings. I enjoy working across the full stack of an AI project, from data pipelines to deployed agents.

EDUCATION

Bachelor of Information Technology

V.V.P Engineering Collage

07/2022 - 03/2026

Rajkot , Gujarat

High School

G.K. DHOLAKIYA School

06/2020 - 05/2022

Rajkot , Gujarat

WORK EXPERIENCE

AI Engineer

Daily Code Solutions

07/2025 – Present

rajkot , gujarat

- Worked on automation projects, building tools to streamline repetitive business workflows.
- Developed enterprise-level AI-powered chatbots for client-facing use cases.
- Built agentic AI systems with multi-agent architectures to handle complex, multi-step tasks.
- Built an autonomous sales system to handle end-to-end sales workflows.

RPA Developer

Botsinbusiness

01/2025 – 05/2025

rajkot , gujarat

- Developed and delivered real-world automation bots for LinkedIn and Google Maps to clients, streamlining data collection for lead generation and business intelligence.
- Built and deployed data extraction bots for various platforms, enabling clients to access structured data for informed decision-making.
- Worked on real-world RPA projects using ElectroNeek Studio and UiPath, automating repetitive tasks to enhance operational efficiency.
- Designed and implemented web scraping solutions tailored to client needs, contributing to data-driven strategies and improved business workflows.
- Developed and deployed automation bots for platforms like LinkedIn and Google Maps to streamline client lead generation workflows.
- Integrated RPA solutions using UiPath and ElectroNeek Studio, reducing manual work and increasing operational efficiency.

Multi-Agent Systems

PERSONAL PROJECTS

Autonomous Sales System

- Agentic AI system that autonomously handles end-to-end sales workflows, from lead qualification to follow-up.
- Built using a multi-agent architecture with LangGraph, coordinating specialized agents for outreach, conversation, and scheduling.
- Integrates with enterprise chatbot and CRM systems to reduce manual sales effort and improve conversion.

Automating Google Sponsored Ads Interaction

- This robust Selenium Python automation tool not only conducts Google searches with precision but also interacts seamlessly with sponsored ads.
- It emulates real user behavior by alternating between mobile and desktop modes.
- The tool performs highly accurate Google searches targeting specific keywords and phrases, interacts with sponsored ads just like a human user, and simulates different geographical locations to test ad performance in various regions.

CARS24 ANALYTICS

- Cars24 Analytics offers a powerful suite of features that empower users with actionable insights derived from extensive data analysis of car ads on Car24.
- From geographic trends to brand popularity, model year dynamics to fuel preferences, every aspect of the market is brought to life, enabling smarter decisions and strategic approaches.
