SUMMARY

Python developer with 2 years of experience building automation, RPA, and agentic AI systems, working across the full stack from data pipelines to deployed AI agents.

WORK EXPERIENCE

AI Engineer | Daily Code Solutions

07/2025 – Present · Rajkot, Gujarat

AI Chatbot & Agentic Platform (Full Stack)

- Built a Python sandbox feature and a multi-mode query execution selector (Auto, Instant, Plan, Deep Research) across API and UI; cut query response time from 3+ minutes to ~45 seconds
- Designed query classification and multi-part deliverable-splitting logic to intelligently route and parallelize complex queries
- Contributed to knowledge base and multi-format file reader features; resolved production bugs flagged by clients

Backend & Client Automation Systems

- Owned backend maintenance and automation scripting for client-facing production systems, resolving issues from script errors, alerts, and incidents
- Built new automation tools from scratch, including client reporting dashboards and e-commerce tracking systems; migrated a retail client's automation pipeline from Selenium to Playwright
- Contributed to a multi-agent chatbot architecture and automated KPI reporting for a separate client engagement

RPA Developer | Botsinbusiness

01/2025 – 05/2025 · Rajkot, Gujarat

- Built AI-powered chatbots and multi-agent agentic systems for client-facing use cases, including an autonomous end-to-end sales workflow system
- Developed and delivered automation bots for LinkedIn and Google Maps, streamlining lead-generation data collection for clients
- Designed web scraping solutions and integrated RPA using UiPath and ElectroNeek Studio to reduce manual work and boost efficiency

EDUCATION

Bachelor of Information Technology · V.V.P. Engineering College, Rajkot | 07/2022 – 03/2026

High School · G.K. Dholakiya School, Rajkot | 06/2020 – 05/2022

SKILLS

Python, Web Scraping, Flask, Selenium, BeautifulSoup, REST API, Docker, SQL, HTML, Agentic AI, LangChain, LangGraph, LLMs, RAG, OpenAI API, Multi-Agent Systems

PERSONAL PROJECTS

Autonomous Sales System · Multi-agent system (LangGraph) automating end-to-end sales workflows from lead qualification to follow-up, integrated with chatbot/CRM systems

Google Sponsored Ads Automation · Selenium-based tool performing precise, human-like Google searches and ad interactions across devices and regions

CARS24 Analytics · Analytics suite surfacing market trends (geography, brand, model year, fuel type) from car listing data

CERTIFICATIONS & LANGUAGES

Certifications: Python (Basic), Problem Solving (Basic) · HackerRank

Languages: English (Professional Working), Hindi (Full Professional), Gujarati (Full Professional)
